Summary

Progress driven, and highly adaptable person who's passionate about learning and implementing the latest and greatest technologies. I enjoy expanding on what I learn through the creation of beautiful and responsive applications. I'm seeking the opportunity to develop and contribute in a professional environment

Technical Skills

Front End

JavaScript ES6+
CSS3/SCSS/SASS
HTML5
React.JS
Redux

Back End

Node.JS
Express.JS
MongoDB
Mongoose

Testing

Jest
Mocha

Toolkit

Git Version Control
Heroku Deployment
Webpack
Babel
NPM

Relevant Experience

Track Expenses App | React.Js, Redux, SCSS, Jest | [Github](#) | [Website](#)

Front End Developer

December 2018

An expense management app that utilizes Google's firebase API for user authentication and data storage.

- Executed React & Redux front-end in ES6, with Babel and Webpack.
- Crafted SCSS styling files written with BEM naming conventions.
- Tested complex React components with the testing Jest framework.

IveyIM | NodeJs, SocketIO, jQuery, MoustacheJs, Mocha | [Github](#) | [Website](#)

Full Stack Developer

January 2019

A chat app that uses socket.io web sockets for instant messaging, chat rooms, and the Google Maps API for location sharing.

- Implemented a backend via NodeJs and ExpressJs.
- Utilized jQuery to handle events and event methods.
- Authored Mocha test for NodeJs functions.

Decision Maker | ReactJs, SCSS, ES6+JavaScript | [Github](#) | [Website](#)

Front End Developer

August 2018

A single page app that utilizes efficient JavaScript and React for a smooth UI.

- Utilizes ES6 JavaScript for local data storage.
- Created functional React Components to work seamlessly with each other and their corresponding styling files.
