Malachi Ivey
Front End Software Developer

#SUMMARY

Progress driven person who's passionate about learning the latest and greatest technologies. I enjoy expanding on what I learn through the creation of beautiful, interactive, and responsive applications. Looking to embark on new journey by developing in a professional environment.

#TECHNICAL SKILLS

HTML5	JAVASCRIPT ES6+	GOOGLE FIREBASE	WEBPACK/BABEL	GIT/VC
CSS3/SCSS	REACT/REDUX	JEST/TESTING/TDD	NPM/YARN	AGILE

#EXPERIENCE

EXPENSE TRACKER — *Javascript / React & Redux / Jest / SCSS / Firebase*

- Executed React & Redux front-end in ES6, with Babel and Webpack.
- Custom SCSS styling written with BEM naming conventions.
- Integrated Google's Firebase API for user authentication and data.
- Tested React components with Jest framework.

setCodeTime — *Javascript / React & Redux / SCSS / Firebase*

- Architected a layered Redux store for use with React.
- Utilized Firebase API for multiple layers of user authentication and data storing.
- Produced custom styling using SCSS/BEM for a mobile friendly application.

DECISION MAKER — *Javascript / React / SCSS / Firebase*

- Implemented advanced ES6+ JavaScript methods to persist user data.
- Employed React to author a functional application with a fluid UI.

Atlanta, GA — *Freelance Front End Developer*

- Writes readable, modular, reusable code using practices such as BEM and asynchronous programming patterns.
- Designs UI/UX for user interactivity.
- Consumes APIs using best practices.
